ABOUT ME

I am Rohit Kumar Jha, a dedicated web developer with proficiency in **HTML**, **CSS**, **JavaScript**, **React.js**, **Node.js**, **Express.js**, and **MongoDB**. I thrive on creating innovative and user-centric web solutions, fueled by a relentless passion for coding and problem-solving.With a strong foundation in both front-end and back-end technologies, I bring a holistic approach to web development projects. I am committed to delivering high-quality, efficient, and elegant solutions that meet both user and business needs.

SKILLS

- HTML
- CSS
- JavaScript
- React Js
- Bootstrap
- Node Js
- Express Js
- Mongodb
- Communication
- Problem-solving
- Adaptability
- Attention to Details

INTERNSHIP/ PROJECTS

CETPA Infotech   **June 2023 - Present**
Full Stack using MERN
During my **internship**, I developed a comprehensive appointment booking system for doctors using the MERN (**MongoDB**, **Express.js**, **React.js**, **Node.js**) stack. This system facilitates seamless patient-doctor interactions by enabling users to schedule appointments, view medical histories, and receive automated reminders. It enhances **healthcare** efficiency and patient satisfaction through a user-friendly interface and robust database **management.**

Personal Projects   **October 2023**
GST Billing System

I designed a GST billing system using React.js, incorporating the **"react-to-print"** module for efficient invoice generation. This system streamlines the billing process for businesses by allowing users to input transaction details, calculate GST, and generate **printable invoices** with ease. Its intuitive interface and integration with the "react-to-print" module ensure a user-friendly and professional billing experience.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Application
Maharshi Dayanand University
2022- Present

Class 12th (PCM)   **71.2%**
Sanskar Bharti Global School
 Completed - 2022

Class 10th   **85.2%**
